Glue Dispensing Kit, 5ml/5cc or 3ml/3cc Syringe, Cap and Tip

Facilitates in precise placement of glue for adhering crystals, rhinestones, cabochons, pearls, etc. to fabric, bead backing, felt, and other materials.

Contents:

5ml/5cc or 3ml/3cc Syringe

Syringe Cap

14-gauge (Olive) Tapered Tips (E6000 or thicker glues)

18-gauge (Green) Blunt Tips (Gem Tac or thinner glues)

Note: Tips and cap screw into the syringe end

How to Videos (Youtube.com, search words = syringe glue how to):

<https://www.youtube.com/watch?v=QHnYlxvvB3k>

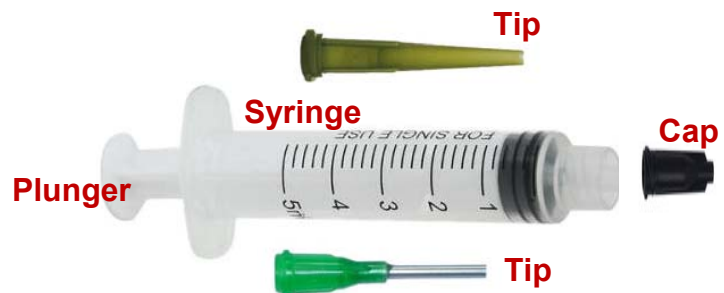

<https://www.youtube.com/watch?v=mFfuNTTtKys>

Warning: Small parts - Keep away from Children (not for children).
See glue instructions for use and safety.

Adding Glue to the Syringe Instructions

- Screw desired Tip into syringe
- Remove plunger
- Insert glue tube into the back of the syringe, keep the syringe level (side to side, not up and down).
- Squeeze glue into the tube until syringe is filled as desired
- Remove glue tube (keep syringe level) and put the lid on the glue
- Insert plunger into syringe to stabilize plunger
- Hold syringe upright (Tip UP) and tap side of syringe until glue is gathered together, and air pockets are removed
- Gentle press plunger until glue just reaches the Tip
- You are ready to go

Tip: Store in a plastic bag (just in case of leakage).
